Summary

Solution-focused developer coming from financial service background with a passion for team projects and client satisfaction. I am keen on development for being creative and solving complex challenges.. Whatever I do, I try to figure out the logic of what is happening, identify structure and patterns, understand ways of processes optimisation.

My vast experience with a variety of teams and subordinates allows me to easily adapt to a newly-introduced fast-paced environment, to quickly learn new things and to efficiently interact with colleagues and customers to strengthen the teamwork and bring our vision to reality.
